OBJECTIVE

Detail-oriented B.Tech AIML student with strong analytical mindset and hands-on experience in Excel, VBA automation, Power Query, and advanced Excel reporting. Skilled in streamlining workflows, building macros, and automating repetitive processes to improve accuracy and efficiency. Seeking a role as a **VBA Developer** to apply automation expertise, problem-solving ability, and collaborative development approach.

EDUCATION

Data Analytics Course (In Progress)	Expected 2026
Bachelor of Technology (Artificial Intelligence And Machine Learning) - 8.94 CGPA	2021 - 2025
Higher Secondary Certificate (HSC) - 93%	2019 - 2021
Secondary School Certificate (SSC) - 87%	2016 - 2019

EXPERIENCE

AI/ML Intern Krushnasaya Enterprises	Jan 2025 - May 2025 <i>Nagpur</i>
- Automated repetitive tasks and reporting processes using Excel functions and basic VBA scripting. - Worked on data extraction, cleaning, Power Query transformation, and report automation. - Collaborated with team to enhance workflow efficiency and accuracy in data handling. - Performed ETL, debugging code, improving reliability of automated pipelines.	

PROJECTS

Automated IPL Cricket Performance Dashboard (Excel + VBA + Power Query)
Designed dynamic dashboard with Excel macros, automated imports using Power Query, and performance-wise drilldowns. Enabled one-click refresh reports for teams, players, runs strike rates.
Retail Report Automation using Excel VBA + Power Query
Automated data cleaning report generation using VBA macros. Implemented slicer-driven KPI dashboard for region, category sales analytics. Reduced manual reporting time significantly.
Inverse Kinematics Robotic Model (Python + OpenCV)
Designed real-time joint movement optimization system; implemented algorithm-based automation to reduce computational load and improve adaptability.

SKILLS

Core VBA Skills	Excel Macros, VBA Scripting, Power Query, Word Automation, MS Access
Database	SQL Queries, Data Fetching, Data Cleaning, ETL
Technical	Python, Pandas, Numpy
Tools	MS Excel (Advanced), Power BI, MS Word, MS Access, Figma
Soft Skills	Analytical Thinking, Team Collaboration, Problem Solving
Preferred (Learning)	SharePoint, HTML, VBScripting, Power Apps

PUBLICATION

Real-Time Inverse Kinematic Function Generation For Robotic Joints Research Paper	09/2024
Accepted By 2nd DMIHER International Conference On Artificial Intelligence in Healthcare, Education and Industry
